

Zeeshan Khan

Senior Software Engineer

Industry Experience: 7+ Years

Shopify Expert | Skilled in Node.js & PHP Development

Linkites

OVERVIEW

- Results-driven and detail-oriented Software Engineer specializing in **Shopify development and backend technologies**. Skilled in building robust, scalable, and high-performing eCommerce solutions tailored to business needs. Proficient in **Node.js, PHP, and Liquid**, with a proven track record of customizing Shopify themes, apps, and integrations to enhance user experience and optimize store performance.
- Experienced in **end-to-end software development**, from gathering requirements and system design to development, testing, and deployment. Adept at collaborating with clients and cross-functional teams to translate business requirements into technical solutions while maintaining code quality and performance.
- Proactive in **troubleshooting complex issues, optimizing site speed, and implementing secure and scalable backend architectures**. Well-versed in **Agile methodologies**, sprint planning, and technical documentation to ensure smooth project execution and client satisfaction.

PROJECTS

Project 1- Duration Jan 2023- Present

Project Name	Ring Concierge
Tools & Technologies	Shopify, Nodejs, jQuery, Github, Figma, Slack, Trello, Themekit, Shopify CLI
Team Size	15
Role	Shopify Team Lead
Project Description	Ring Concierge is the leading luxury jeweler committed to designing for women, by women. Founded by Nicole Wegman in 2013, Ring Concierge has consistently scaled its growth year-over-year by strategically utilizing social media to successfully blur the lines between retailer and influencer. In an industry that has been historically dominated by men, Nicole is disrupting with her vision to design forever pieces that are both inspirational and attainable. The brand has successfully built its bespoke bridal business along with its more accessible fine jewelry collection and multiple brick-and-mortar retail locations in NYC, LA, Houston, and Boca Raton.
Responsibilities & Achievements	• Lead the Shopify development team by planning and delegating tasks, ensuring smooth project execution, and maintaining alignment with project timelines. • Provided technical guidance and mentorship to team members, conducting detailed code reviews to ensure code quality, scalability, and adherence to best practices. • Designed and implemented custom functionalities across the website, ensuring all features were aligned with client specifications and business objectives. • Acted as the primary liaison with clients, facilitating clear communication to gather requirements, provide progress updates, and address feedback promptly. • Collaborated on requirement analysis and technical planning, ensuring solutions were both technically feasible and aligned with business goals. • Streamlined team workflows by improving development processes and implementing efficient project management practices. • Contributed to successful project deliveries, ensuring all milestones were met while maintaining high-quality standards.

Project 2- July 2022- Jan 2023

Project Name	Anya
Tools & Technologies	Shopify, Nodejs, jQuery, Google Firebase, Github, Figma, Trello, Slack, Themekit
Team Size	5

Role	Shopify Developer
Project Description	Anya was founded with the mission of making women's health, particularly postpartum care, a priority. The journey began with direct conversations with mothers to understand their postpartum experiences and the challenges they faced. Many shared that existing products were ineffective or unsafe, especially during breastfeeding. To build a data-driven foundation, feedback was gathered from over 2,000 mothers, revealing a significant gap in postpartum care — too many women were struggling in silence, believing their challenges were "normal" and unavoidable. Named in honor of the founder's mother, Anya focuses on providing trusted information and carefully developed solutions to support women during postpartum recovery, ensuring safety, quality, and comfort.
Responsibilities & Achievements	● Designed and implemented custom functionalities across the website, ensuring all features were aligned with client specifications and business objectives. ● Developed and integrated tailored Shopify solutions, including theme customization, app integration, and backend logic to enhance site performance and user experience. ● Ensured cross-platform compatibility and responsiveness, delivering a polished and fully functional user experience across devices. ● Conducted rigorous testing and quality checks to guarantee the accuracy, performance, and reliability of all custom features.

Project 3- July 2021- September 2022

Project Name	Seen Dating
Tools & Technologies	PHP, Yii Framework, MySql, JQuery, Jira, Github, Slack, Datadog, Twilio
Team Size	5
Role	Shopify Developer
Project Description	SEEN is a next-generation dating app built with a unique concept of transparency. Unlike traditional dating apps, SEEN allows users to view a potential match's past text chats and video conversations with other daters, helping them form a more genuine and informed connection. The application is designed to create an authentic dating experience by eliminating misleading profiles and providing deeper insights into how users interact. Through its innovative features, SEEN prioritizes honesty, safety, and meaningful

	connections rather than surface-level swiping.
Responsibilities & Achievements	• Worked as a Backend Developer, designing and developing robust and scalable APIs to power the mobile application. • Integrated Twilio services for real-time audio and video calling, ensuring seamless and reliable communication between users. • Developed and implemented the chat functionality using Twilio, enabling real-time text messaging with optimal performance and security. • Created a comprehensive Admin Panel to allow administrators to manage and monitor all user activities, content, and interactions within the application. • Collaborated with front-end and mobile developers to ensure smooth API integration and maintain high application performance.

Project 4- September 2022- December 2022

Project Name	Rootly
Tools & Technologies	Shopify, jQuery, Github, Figma, Trello, Slack, Themekit
Team Size	3
Role	Shopify Developer
Project Description	Rootly is an eCommerce platform dedicated to offering premium haircare products for both men and women. The platform focuses on delivering a personalized shopping experience, showcasing a wide range of products designed for different hair types and needs. The project aimed to create a user-friendly and visually appealing online store with custom functionalities to improve product discovery, enhance customer experience, and streamline the purchase process. Rootly emphasizes quality, transparency, and customer satisfaction, catering to modern consumers looking for effective and reliable haircare solutions.
Responsibilities & Achievements	• Designed and implemented custom functionalities across the website, ensuring all features were aligned with client specifications and business objectives. • Developed and integrated tailored Shopify solutions, including theme customization, app integration, and backend logic to enhance site performance and user experience. • Ensured cross-platform compatibility and responsiveness, delivering a polished and fully functional user experience across devices. • Conducted rigorous testing and quality checks to guarantee the accuracy, performance, and reliability of all custom features.

Project 5- July 2022- September 2022

Project Name	Soapery
Tools & Technologies	Shopify, jQuery, Github, Figma, Trello, Slack, Themekit
Team Size	4
Role	Shopify Developer
Project Description	Soapery is an eCommerce platform focused on offering natural, eco-friendly, and handmade soaps crafted from high-quality, skin-safe ingredients. The project aimed to build a modern, visually appealing, and user-centric online store that highlights the brand's commitment to sustainability and chemical-free skincare products.
Responsibilities & Achievements	• Designed and implemented custom functionalities across the website, ensuring all features were aligned with client specifications and business objectives. • Developed and integrated tailored Shopify solutions, including theme customization, app integration, and backend logic to enhance site performance and user experience. • Ensured cross-platform compatibility and responsiveness, delivering a polished and fully functional user experience across devices. • Conducted rigorous testing and quality checks to guarantee the accuracy, performance, and reliability of all custom features.

Project 6- January 2020- November 2020

Project Name	Baqat4u
Tools & Technologies	PHP, CodeIgniter, MySQL, jQuery, Github, Figma
Team Size	7
Role	Backend Developer
Project Description	Launched in July 2019, BAQAT4U is a comprehensive and well-organized classified ads platform that primarily serves the UAE market. Designed as both a search engine and business guide, it helps users quickly and easily find products, services, and events, while also showcasing top market trends. The platform offers hundreds of categories, organized by occasion and event type, enabling users to seamlessly browse, find deals, and connect with businesses. It is a powerful tool for individuals and companies to promote their services or products by posting ads, joining a vast business community, and increasing market visibility.

	With its user-friendly design , BAQAT4U aims to deliver a smooth experience for both buyers and advertisers, making it a go-to platform for discovering opportunities in the UAE market.
Responsibilities & Achievements	• Developed a complete Admin Panel to dynamically manage all site content, ensuring seamless control over the platform's operations. • Created and designed the complete MySQL database schema to efficiently manage all operations. • Implemented functionalities for creating, editing, publishing, and managing classified ads, enabling real-time content updates visible to users. • Built logic to make every UI section fully customizable through the Admin Panel, offering flexibility for content and layout adjustments without developer intervention. • Collaborated with the frontend team to ensure proper synchronization between UI elements and dynamic data from the admin system. • Focused on scalability and usability, ensuring the Admin Panel could handle large datasets and complex ad management tasks efficiently.

Project 7- September 2020- June 2021

Project Name	Hidayah Junior College Admin
Tools & Technologies	PHP, CodeIgniter, MySql, jQuery, Github, Figma
Team Size	4
Role	Backend Developer
Project Description	Hidayah Junior College Admin is a comprehensive school management system designed to streamline and automate administrative tasks. The platform manages student records, admissions, attendance, and fee collections, ensuring smooth day-to-day operations for the institution. A key feature of the system is the integration of secure payment gateways, allowing parents and students to pay fees online conveniently. The platform is built to provide administrators with a centralized dashboard to monitor student details, financial transactions, and other academic activities.
Responsibilities & Achievements	• Created and designed the complete MySQL database schema to efficiently manage all school operations, including student records, academic data, and financial transactions. • Developed core modules for student management, admissions, attendance tracking, and academic performance monitoring. • Integrated secure payment gateways to enable seamless and reliable online fee collection. • Built dynamic admin panels for staff to manage and monitor student data, fee status, and operational

	workflows. Ensured data integrity, security, and scalability across all modules with optimized queries and relational database design.

Project 8- August 2020- December 2020

Project Name	Anytime Study (E-Learning)
Tools & Technologies	PHP, Laravel, MySQL, jQuery, Github, Figma, Stripe Payment Gateway.
Team Size	5
Role	Backend Developer
Project Description	Any Time Study is a modern e-learning website designed to provide flexible online education opportunities. Users can browse and enroll in listed classes or request custom classes if their desired course is not available, ensuring a personalized learning experience. The platform focuses on delivering an intuitive user interface for students while enabling administrators to manage courses, student enrollments, and class requests effectively. It is designed for scalability and user engagement, catering to both individual learners and institutions.
Responsibilities & Achievements	Developed and designed the complete MySQL database to handle all operations, including classes, students, teachers, parents, and enrollments. - Built a dynamic UI to display all available classes and custom course requests in real-time. Integrated multiple payment gateways such as Stripe, Paytm, and PayPal for seamless and secure online payments. Created a complete admin panel to manage all aspects of the platform, including classes, teachers, students, and parents. - Enabled admin controls to activate/deactivate classes, create or remove teachers, and oversee all platform activities. - Implemented user registration functionality for both teachers and students, ensuring smooth onboarding and account management.

Project 9- March 2020- June 2020

Project Name	Arms Length Legal
Tools & Technologies	Wordpress, jQuery, Figma, Hostinger
Team Size	3
Role	Web Developer
Project Description	Arms Length Legal is a premier full-service law firm, Lawyers & Advocates in Kota, offering end-to- end legal solutions with a client-centric approach. True to our name, we remain just an arm's length away—delivering swift, strategic, and reliable legal support.
Responsibilities & Achievements	• Developed and designed the website on WordPress, ensuring a professional and user-friendly layout to reflect the firm's premium brand identity. • Customized WordPress themes to meet the firm's specific requirements, including service pages, lawyer profiles, and contact forms. • Implemented dynamic content sections to highlight legal services, case studies, and client success stories. • Ensured easy content management through WordPress CMS for non-technical staff to update services, blogs, and other site content.

Project 10- August 2019- December 2019

Project Name	Jobzee - HR & Recruitment Platform
Tools & Technologies	Wordpress, jQuery, Figma, Hostinger
Team Size	3
Role	Web Developer
Project Description	Jobzee HR Solutions is a global recruitment and talent management platform designed to connect businesses with highly qualified candidates. With a global footprint, Jobzee offers end-to-end talent solutions, including candidate sourcing, evaluation, and retention strategies. The platform leverages a dedicated research team to develop innovative methods for attracting and engaging top talent, ensuring a superior recruitment experience for both employers and job seekers. The primary goal of the project was to create a user-friendly and scalable recruitment platform that streamlines job postings, candidate applications, and employer-candidate interactions while ensuring efficient talent management.

Responsibilities & Achievements	• Developed and designed the website on WordPress, ensuring a professional and user-friendly layout to reflect the firm's premium brand identity. • Customized WordPress themes to meet the firm's specific requirements, including service pages, lawyer profiles, and contact forms. • Implemented dynamic content sections to highlight legal services, case studies, and client success stories. • Ensured easy content management through WordPress CMS for non-technical staff to update services, blogs, and other site content.
